### 2.08 Going Concern

The Company has adequated resources to continue its operation for foreseeable future and hence, the financial statements have been prepared on going concern basis. As per managements' assessment there are no material uncertainties related to events or conditions (effects of COVID-19)which may cast significant doubt upon the company's ability to continue as a going concern.

### 2.09 COVID-19

The Novel Corona Virus COVID-19 pandamic is spreading around the globe rapidly. The virus has taken its toll on not just human life, but business and financial markets too. The extend of which is currently indeterminate. The partial impacts are reflacted in its financial statements for this period.

### 2.10 Applicable Accounting Standards

The following IASs and IFRSs are applicable for preparation and reporting of the Financial Statements for the year under review:

IAS-1 Presentation of Financial Statements

IAS-2 Inventories

- IAS-7 Statement of Cash Flows
- IAS-8 Accounting Policies, Changes in Accounting Estimates and Errors
- IAS-10 Events after the Reporting Period

IAS-12 Income Taxes

- IAS-16 Property, Plant and Equipment
- IAS -19 Employee Benefits
- IAS-21 The Effects of Changes in Foreign Exchange Rate
- IAS-23 Borrowing Costs
- IAS-24 Related Party Disclosures
- IAS-33 Earnings Per Share
- IAS-36 Impairment of Assets
- IAS-37 Provisions, Contingent Liabilities and Contingent Assets
- IAS-38 Intangible Assets
- IFRS-7 Financial Instruments: Disclosures
- IFRS-9 Financial Instruments
- IFRS-13 Fair Value Measurement
- IFRS-15 Revenue from Contract with Customers
- IFRS-16 Leases

### 2.11 Changes in significant accounting policies

Due to the transition methods chosen by the Company in applying the standard, comparative information throughout these financial statements has not been restated to reflect the requirements of the new standard. The Company initially applied IFRS 16 Leases from 01 July 2019.

### a) As a lessee

As a lessee, the Company recognized leases land as a Right of Use (RoU) assets. The Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Company. Under IFRS 16, the Company recognises right-of-use assets and lease liabilities for all of these leases - i.e. these leases are on-balance sheet. At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone price.

### Leases classified as operating leases under IAS 17

Previously, the Company classified leases land as operating leases under IAS 17. On transition, for these leases, lease liabilities were measured at the present value of the remaining lease payments, discounted at the Company's incremental borrowing rate . Right-ofuse assets are measured at either:

- their carrying amount as if IFRS 16 had been applied since the commencement date, discounted using the Company's incremental borrowing rate at the date of initial application: the Company applied this approach to its largest property lease; or

- an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments: the Company applied this approach to all other leases. The Company has tested its right-of-use assets for impairment on the date of transition and has concluded that there is no indication that the right-of-use assets are impaired.

The Company used a number of practical expedients when applying IFRS 16 to leases previously classified as operating leases under IAS 17. In particular, the Company:

did not recognise right-of-use assets and liabilities for leases for which the lease term ends within 12 months of the date of initial application:

- did not recognise right-of-use assets and liabilities for leases of low value assets;

### 2.12 Use of Estimates and Judgments

The preparation of the financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Estimates and assumptions are reviewed on an ongoing basis.

The estimates and underlying assumptions are based on past experience and various other factors that are believed to be reasonable under the circumstances, the result of which form the basis of making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year, or in the year of revision and future years if the revision affects both current and future years.

In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies

that have the most significant effect on the amounts recognised in the financial statements is included in the following notes:

- Note: 4 Property, plant and equipment
- Note: 7 Intangible assets
- Note: 9 Inventories
- Note: 10 Accounts receivable
- Note: 18 Deferred tax liabilities
- Note: 21 Provision for income tax

### 2.13 Comparative Information and reclassification

Comparative information has been disclosed for all numerical information in the financial statements and also the narrative and descriptive information when it is relevant for understanding of the current period financial statements. To facilitate comparison, certain relevant balances pertaining to the previous period have been rearranged/ reclassified wherever considered necessary to conform to current periods presentation.

### 2.14 Reporting Period

The financial statements of the company covers one year from 01 July to 30 June and is followed consistently.

### 3.00 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The specific accounting policies selected and applied by the company's directors for significant transactions and events that have material effect within the framework of IAS-1 "Presentation of Financial Statements", in preparation and presentation of financial statements have been consistently applied throughout the year and were also consistent with those used in earlier years.

For a proper understanding of the financial statements, these accounting policies are set out below in one place as prescribed by the IAS-1 "Presentation of Financial Statements". The recommendations of IAS-1 relating to the format of financial statements were also taken into full consideration for fair presentation.

Items of property, plant and equipment are stated at cost and re-valued amount less accumulated depreciation and accumulated impairment losses, if any.

### 3.02.01 Recognition and Measurement

The cost of an item of property, plant and equipment comprises its purchase price, import duty and non-refundable taxes (after deducting trade discount and rebates) and any cost directly attributable to the acquisition of the assets. The cost of self constructed/installed assets includes the cost of materials, direct labour and any other costs directly attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the intended manner and the cost of dismantling and removing the items and restoring the site on which they are located.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The gain or loss on disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of the property, plant and equipment and is recognised under other income/expenses in the statement of profit or loss and other comprehensive income.

# 3.02.02 Subsequent Costs

The cost of replacing or upgrading part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the company and its cost can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in the statement of profit or loss and other comprehensive income.

### 3.02.03 Depreciation

Land is held on a freehold basis and is not depreciated considering the unlimited useful life. In respect of all other property, plant and equipment, depreciation is recognised in statement of profit or loss and other comprehensive income on diminishing balance method over the estimated useful lives of property, plant and equipment. Significant parts of individual assets are assessed and if a component has a useful life that is different from the remainder of that asset, that component is depreciated separately.

Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation of an asset ceases at earlier of the date that the asset is classified as held for sale in accordance with IFRS 5 and the date that the asset is derecognised. The depreciation method used reflects the pattern in which the assets' economic benefits are consumed by the entity. After considering the useful life of assets as per IAS-16 "Property, plant and equipment", the annual depreciation have been applied.

CATEGORY OF ASSETS	RATE OF DEPRECIATION (%)
Hotel Building	2%
Plant and Machineries	5%
Equipment and Appliance	5% - 10%
Office Equipment	10%
<ul> <li>Electrical Equipment</li> </ul>	10%
Air Conditioner	5%
Kitchen Equipment	5%
<ul> <li>House Keeping Equipment</li> </ul>	10%
Bar Equipment	10%
<ul> <li>Security Equipment</li> </ul>	10%
• Linen	10%
• SPA	5%
Wooden Floor	5%
Tumbler Drier	5%
Motor Vehicles	10%
Furniture & Fixtures	5%
Office Decoration	5%

Depreciation methods, useful lives and residual values are reassessed at the reporting date and adjusted if appropriate.

Upon retirement of assets, the cost and related accumulated depreciation are eliminated from the accounts and resulting gain or loss is credited or charged to statement of profit or loss and other comprehensive income.

### 3.02.04 Revaluation of Property, Plant and Equipment

Since inception, the company revalued its non-current assets for the 1st time in the year 2010-2011 by Syful Shamsul Alam & Co, Chartered Accountants. Reserve was created by the sum of revaluation surplus as per the provision of IAS-16.

The board of directors agreed to discard the revaluation surplus of all assets except Land & Land Development in a board meeting held on 05 August 2012 and instructed the management to consider the proper accounting policies for it.

### 3.03 Intangible Asset

### 3.03.01 Recognition and Measurement

Intangible assets that are acquired by the company and have finite useful lives are measured at cost less accumulated amortization and accumulated impairment loss, if any. Intangible assets are recognised when all the conditions for recognition as per IAS 38: "Intangible Assets" are met. The cost of an intangible asset comprises its purchase price and any directly attributable cost of preparing the asset for its intended use.

### 3.03.02 Subsequent Costs

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it

relates. All other expenditures are recognised in statement of profit or loss and other comprehensive income as incurred.

### 3.03.03 Amortisation

The intangible assets of the company are ERP (Tally) and Hotel Management software which are amortised every month following straight line method for 10 (ten) years. The amortisation cost is charged in statement of profit or loss and other comprehensive income.

Amortisation methods, useful lives and residual values are reassessed at the reporting date and adjusted if appropriate.

### 3.04 Capital Work-in-Progress

Property, Plant and Equipment under construction/acquisition is accounted for as capital work-in-progress until construction/acquisition is completed and measured at cost.

3.05 The Company has applied IFRS 16 using the modified retrospective approach and therefore the comparative information has not been restated and continues to be reported under IAS 17.

### Policy applicable from 1 January 2019

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in IFRS 16. This policy is applied to contracts entered into, on or after 1 January 2019.

### As a lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate.

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

# Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is re-measured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

### Short-term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

### Policy applicable before 1 January 2019

All the lease transactions have been classified based on the extent to which risks and rewards incidental to ownership of the assets lie with the lessor or lessee. According to this classification, all the Company's lease transactions have been identified as operating lease as per IAS 17: Leases based on the substance of the transactions, not merely on the legal form.

### 3.06 Inventories

### Nature of inventories

Inventories comprise of food, beverage, house keeping materials, printing & stationary, stores & spares etc.

### Valuation of the inventories

Inventories are measured at lower of cost and net realizable value. The cost of inventories include expenditure incurred in acquiring these inventories, and other costs incurred in bringing them to their existing location and condition in accordance with IAS 2 "Inventories".

Category	Valuation		
Food	Weighted average cost		
Beverage	Weighted average cost		
House Keeping Materials	Weighted average cost		
Printing & Stationary	Weighted average cost		
Store & Spares	Weighted average cost	٨.	
Net realisable value is the estimated selling price	in the ordinary course of	of business less the estimated costs of completion and	

# selling expenses.3.07 Financial Instruments

 $\Lambda$  financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

### 3.07.01 Financial Assets

The Company initially recognises, loans receivables and deposits on the date that they are originated. All other financial assets are recognised initially on the date at which the company becomes a party to the contractual provisions of the instrument.

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expires, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial assets are transferred.

Financial assets are classified into the following categories: financial assets at fair value through profit or loss, held to maturity, loans and receivables and available-for-sale financial assets.

### At fair value through profit or loss

A financial asset is classified as at fair value through profit or loss if it is classified as held for trading or is designated as such on initial recognition. Financial assets are designated as at fair value through profit or loss if the company manages such investment and makes purchase or sale decisions based on their fair value in accordance with the company's documented risk management or investment strategy. Attributable transactions costs are recognised in profit and loss as incurred. Financial assets at fair value through profit or loss. Investment in equity securities and debt securities are classified under at fair value through profit or loss.

### Held to maturity

These assets are initially recognised at fair value plus any directly attributable transaction cost. Subsequent to initial recognition, they are measured at amortized cost using the effective interest method.

### Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortized cost.

Loans and receivables comprise cash and cash equivalents, loans, accounts receivables and deposits.

### (a) Account receivable

Account receivable are initially recognised at cost which is the fair value of the consideration given in return. After initial recognition, these are carried at cost less impairment losses, if any, due to un-collectability of any amount so recognised. There is no fixed company policy regarding provision for impairment loss on receivables, if any receivables are not realized within the credit period. It has been dealt with on case to case basis.

### (b) Advances, deposits and prepayments

Advances are initially measured at cost. After initial recognition, advances are carried at cost less deductions, adjustments or charges to other account heads such as Property, Plant and Equipment, Inventory or Expenses.

### Deposits are measured at payment value.

Prepayments are initially measured at cost. After initial recognition, prepayments are carried at cost less charges to statement of profit or loss and other comprehensive income.

### (c) Cash and cash equivalents

Cash and cash equivalents comprise cash in hand and demand deposits, together with short-term, highly liquid investments that are readily convertible to a known amount of cash, and that are subject to an insignificant risk of changes in value.

### Available-for-sale

Available-for-sale financial assets are non-derivative financial assets that are designated as available for sale and are not classified in any other categories of financial assets. Generally available-for-sale financial assets are recognised initially at fair value plus any directly attributable transaction costs and subsequent to initial recognition at fair value and changes therein other than impairment losses are recognised in other comprehensive-income and presented in the fair value reserve in equity. Financial assets which are not traded in the market have been valued at cost unless any indication of impairment in value of such financial assets exist. Cumulative gain/losses recognised in the other comprehensive income are reclassified from equity to profit or loss upon derecognition or reclassification.

### 3.07.02 Financial Liabilities

The company initially recognises all financial liabilities on the trade date which is the date the company becomes a party to the contractual provisions of the instrument.

The company derecognises a financial liability when its contractual obligations are discharged, cancelled or expired.

The company classifies non-derivative financial liabilities into the other financial liabilities category. Such financial liabilities are recognised initially at fair value less directly attributable transaction cost. Subsequent to initial recognition, these financial liabilities are measured at amortised cost.

Other financial liabilities comprise loans and borrowings, bank overdrafts and accounts payable.

### (a) Accounts payable

The company recognises a financial liability when its contractual obligations arising from past events are certain and the

settlement of which is expected to result in an outflow from the company of resources embodying economic benefits.

### b) Interest-bearing borrowings

Interest-bearing borrowings comprise loans and operational overdraft.

### 3.08 Impairment

### 3.08.01 Financial Assets

Financial assets are impaired if objective evidence indicates that a loss event has occurred after initial recognition of the assets and that the loss event had a negative effect on the estimated future cash flows of that assets that can be estimated reliably.

Financial assets not classified as at fair value through profit or loss, including an interest in an equity accounted investee, are assessed at each reporting date to determine whether there is objective evidence of impairment.

Objective evidence that financial assets are impaired includes:

- default or delinquency by a debtor

- restructuring of an amount due to the company on terms that the company would not consider otherwise
- indications that a debtor or issuer will enter bankruptcy
- adverse changes in the payment status of borrowers or issuers
- the disappearance of an active market for a security, or
- observable data indicating that there is a measurable decrease in expected cash flows from a group of financial assets

For an investment in an equity security, objective evidence of impairment includes a significant or prolonged decline in its fair value below its cost.

### 3.08.02 Financial Assets Measured at Amortised Cost

The company considers evidence of impairment for these assets at both an individual asset and a collective level. All individually significant assets are individually assessed for impairment. Collective assessment is carried out by grouping together assets with similar risks characteristics.

In assessing collective impairment, the company uses historical information on the timing of recoveries and the amount of loss incurred, and makes any adjustment if current economic and credit conditions are such that the actual losses are likely to be greater or lesser than suggested by historical trends.

An impairment loss is calculated as the difference between an asset's carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account. When the company considers that there is no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through profit or loss.

### 3.08.03 Available for Sale Financial Assets

Impairment losses on available for sale financial assets are recognised by reclassifying the losses accumulated in the fair value reserve to profit or loss. The amount reclassified is the difference between the acquisition cost (net of any principal repayment and amortization) and the current fair value, less any impairment loss previously recognised in profit or loss. If the fair value of an impaired available for sale debt security subsequently increases and the increase can be related objectively to an event occurring after the impairment loss is reversed through profit or loss; otherwise, it is reversed through other comprehensive income.

### 3.08.04 Non Financial Assets

The carrying amounts of the company's property, plant and equipment are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the property, plant and equipment's recoverable amount is estimated. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses, if any, are recognised in the statement of profit or loss, other comprehensive income and equity as applicable.

### 3.09 Transactions with Related Parties

The objective of IAS 24 "Related Party Disclosure" is to ensure that an entity's financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and profit or loss may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

Parties are considered to be related if one party has the ability to control the other party or to exercise significant influence or joint control over the other party in making financial and operating decisions.

A party is related to an entity if: [IAS 24.9] directly, or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with, the entity has an interest in the entity that gives it significant influence over the entity, has joint control over the entity, the party is a member of the key management personnel of the entity or its parent, the party is a close member of the family of any individual, the party is an entity that is controlled, jointly controlled or significantly influenced by or for which significant voting power in such entity resides with, directly or indirectly, any individual and the party is a postemployment benefit plan for the benefit of employees of the entity.

### 3.10 Share Capital

Paid-up-capital represents total amount contributed by the shareholders and bonus shares issued by the company to the ordinary shareholders. Incremental costs directly attributable to the issue of ordinary shares are recognised as expenses as and when incurred. Holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to vote at shareholders' meetings. In the event of a winding up of the company, ordinary shareholders rank after all other shareholders. Creditors are fully entitled to any proceeds of liquidation before all shareholders.

### 3.11 Employee Benefit Schemes

The company maintains both defined contribution plan and defined benefit plan for its eligible permanent employees.

### 3.11.01 Defined Contribution Plan

A defined contribution plan is a post-employment benefit plan under which the company pays fixed contributions into a separate fund and will have no legal or constructive obligation to pay further amount. The company maintains the Provident Fund for all permanent employees at which both the company and employees contribute @ 7% of basic salary. The Employees' Provident Fund is considered as defined contribution plan as it meets the recognition criteria specified for this purpose in IAS-19.

Obligation for contribution to defined contribution plan is recognised as provident fund (PF) contribution expenses in profit or loss in the year during which services are rendered by employees. Advance against PF is recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

### 3.11.02 Defined Benefit Plan

### Workers' Profit Participation and Welfare Funds

The company also recognises a provision for Workers' Profit Participation and Welfare Funds @ 5% of net profit before tax in accordance with the provision of Section 234 (Kha), Chapter 15 of Bangladesh Labour Law 2006.

### 3.12 Income Tax Expenses

Income tax expenses comprise current tax and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

### 3.12.01 Current Tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using rates enacted or substantially enacted at the reporting date and any adjustment to tax payable in respect of previous years.

### 3.12.02 Deferred Tax

Deferred tax is recognised in compliance with IAS 12: Income taxes, providing for temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and amount used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the authority on the same taxable entity. A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax on revaluation surplus of land and land development has not been recognised in the financial statements on the ground that income tax payable at source on capital gain during registration of sale of land are generally borne by the buyer. Hence, possibility of having any income tax implications on land is very remote.

### 3.13 Provisions and Contingencies

A provision is recognised in the Statement of Financial Position when the company has a legal or contractual obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Contingencies arising from claims, litigations, assessments, fine, penalties etc. are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Contingent assets are not recognised.

### 3.14 Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue comprises sale of rooms, foods, beverages and allied services relating to hotel operations. Revenue is recognised upon rendering of the service, provided pervasive evidence of an arrangement exists, tariff / rates are fixed or are determinable and collectability is reasonably certain. Revenue recognised is net of indirect taxes, returns and discounts.

Revenue from rendering services shall be recognized in compliance with the requirements of IFRS 15 "Revenue from Contract with Customers".

### 3.15 Other Operating Income

Other operating income includes gain / (loss) on sale of non-current assets and miscellaneous receipts. Other operating income is recognised as revenue income as and when realised.

### 3.16 Finance Income and Expenses

### 3.16.01 Finance Income

Interest income on Fixed Deposit Receipts (FDR) and Short Term Deposits (STD) account has recognised when received or accrued on a time basis by reference to the principal outstanding at the effective interest applicable.

### 3.16.02 Finance Expenses

Interest expenses except expenses related to acquisition/construction of assets, incurred during the year are charged to Statement of Profit or Loss and Other Comprehensive Income on accrual basis.

Interest income/expenses on amount due to/due from inter companies, if any, has been recognised periodically.

.

### 3.17 Borrowing Costs

Interest and other costs incurred by the company in connection with the borrowing of funds are recognised as expense in the year in which they are incurred, unless such borrowing cost relates to acquisition / construction of assets in progress that are capitalized as per IAS 23 "Borrowing Costs". Borrowing cost incurred against loan for BMRE project has been capitalised under effective interest rate method.

### 3.18 Foreign Currency Transactions

Transactions in foreign currencies are translated to the functional currency (BDT) at exchange rates at the dates of transactions. Monetary assets and liabilities denominated in foreign currencies at reporting date are re-translated into Bangladesh Taka at the exchange rates ruling at the reporting date. Non-monetary assets and liabilities denominated in foreign currencies, stated at historical cost, are translated into Bangladesh Taka at the exchange rate ruling at the date of transaction. Foreign exchange differences arising on translation are recognised in profit or loss.

### 3.19 Earnings Per Share (EPS)

The company calculates its earnings per share in accordance with International Accounting Standard IAS-33 "Earnings per Share" which has been reported on the face of Statement of Profit or Loss and Other Comprehensive Income.

This represents profit for the year attributable to ordinary shareholders. As there is no preference dividend, non-controlling interest or extra ordinary items, the net profit after tax for the year has been considered fully attributable to the ordinary shareholders.

### 3.19.01 Basic Earnings Per Share

This has been calculated by dividing the basic earnings by the weighted average number of ordinary shares outstanding during the year.

### 3.19.02 Diluted Earnings Per Share:

Diluted earnings per share is required to be calculated for the year when scope for dilution exists.

### 3.20 Measurement of Fair Values

When measuring the fair value of an asset or liability, the entity uses market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data.

If the inputs used to measure the fair value of an asset or liability might be categorised in different levels of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

### Property, plant and equipment

The fair value of land and land development of property, plant and equipment has been determined based on Net Realisable Value Method/ Market Value Method depending on the nature and corresponding circumstances.

### Equity and debt securities

Fair values of tradable equity and debt securities are determined by reference to their quoted closing price in active market at the reporting date which are categorised under 'Level 1' of the fair value hierarchy.

### 3.21 Events After the Reporting Period

Events after the reporting period that provide additional information about the company's position at the date of Statement of

Financial Position or those that indicate the going concern assumption is not appropriate are reflected in the Financial Statements.

Events after the reporting period that are not adjusting events are disclosed in the notes when material.

### 3.22 Finance Cost

Finace Cost mainly increased due to increse of long term borrowings and Adoption of IFRS-16
